

## AQUA GLOSKOT™

(Protective Surface Gloss Coating)

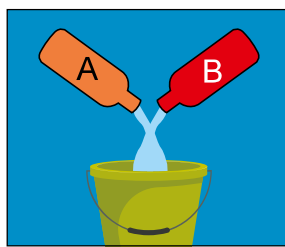

**Aqua Gloskot** is a water base film coating product which gives an excellent gloss to the applied surface. It provides excellent resistance to the surface against water, oil, chemical and scratch.

**WHERE TO USE:** Aqua Gloskot can be used on surfaces like rough marble, rough granite, sand stone, slate stone, concrete and paver blocks.

**HOW TO USE:** Clean the surface thoroughly. Mix part A with part B in the ratio of 3:1 and stir well before use. Apply first coat with low hand pressure pump, brush, cotton cloth or sponge. Apply second coat after 30 mins. Wait for 24 hours to air cure.

### ADVANTAGES:

- Nano technology.
- Great abrasion resistance.
- Excellent mechanical resistance.
- Super chemical resistance.
- Good stability against abrasion & weather.
- Excellent mar and scuff resistance.

**COVERAGE:** 1 Ltr per 5/15 m<sup>2</sup>

SHELF LIFE:	PACKAGING:
Up to 24 months in unopened condition.	1.330 kg.
