

AQUA WHITONER™

(Stone Stain Cleaner)

Aqua Whitener is a special blend of acidic based substance. It is a heavy duty detergent that is purposely made to get rid of yellowish effect from white marble like thassos, satvario or any white marble and granite. It does not damage or dull the polished surface.

WHERE TO USE: Aqua Whitener can be used on marble and granite surfaces.

HOW TO USE: Clean the surface thoroughly with water. Make it clean, dry and free from dust and debris. Apply Aqua Whitener on the area that is stained. Cover the stain area with plastic of good quality and use a masking tape to stick the edges of plastic to the surface. Leave it for 24 hours depending on the type of the stain.

ADVANTAGES:

- Fast acting formula.
- Powerful whitening effect.
- Strong cleaning power

COVERAGE: 1 Ltr per 10/15 m²
